“Whatever it takes. Our people are driven to succeed” – *Bob Peacock, President, ALMAG Aluminum*

Recognized as one of Canada’s Best Managed Companies, ALMAG understands that true customer satisfaction comes from delivering an exceptional service and a superior product. Our goal is to provide Customers with peace of mind knowing that quality products, short lead times and customer satisfaction is our top priority through all four pillars of service — Design, Extrude, Fabricate and Finish. We believe in building strong relationships around reliability and ownership which go hand-in-hand with our core values; respect and fairness, humility, passion for progress and ownership. Recognizing that people create culture, our core values are fundamental drivers of our workplace environment.

JOB DESCRIPTION

Directly responsible to Fabrication Supervisor. Must communicate well with all plant production personnel. Functionally responsible for the production and quality of fabricated parts as per fabrication drawings. Ensure that a safe working environment is maintained at all times. This will be done by following Company policies and procedures. We believe that every Employee is responsible to act safely and to model good safety practices.

Key Responsibilities

- Set-Up and operate all CNC and other machines in the Fabrication Department in an effective and cost efficient manner while maintaining good quality and safety standards, some programming may be required.
- Make adjustments to the machining program as required.
- Fabricate the required parts based on the Fabrication Drawing.
- Perform required PM checks daily as required.
- Follow work order specifications and packing instructions.
- Read and follow all notes in Epics.

- Ensure first piece sample is double checked by other plant personnel.
- Ensure material is identified for Die number, work order number and quantity. If material is being used from stock, have stock number identified on work order.
- Ensure material is checked for proper cut length before fabrication.
- Responsible for reporting equipment malfunction.
- On-time order completion.
- Comply with all quality related policies, procedures and system requirements.
- Perform other jobs as required.

DESIRED SKILLS AND EXPERIENCE

Experience

- Candidates should have a minimum of 1-2 years in CNC Set-Up/Machine Operation.
- Must have good team building and motivational skills.
- Should have a good command in English, written and oral with the ability to train other employees.
- Must be familiar with precision measuring instruments and the ability to read drawings.
- Ability to work well with numbers is essential.
- A solid understanding of the following equipment/technology; CNC machine, square, tape measure, punch press/press brake, Mastercam software, linear measuring machine, weighting scale, drills, digital calliper, Faro cmm, calculator deburring wheel.

Education

- High School Graduation and relevant production experience is desirable.
