“Whatever it takes. Our people are driven to succeed” – *Bob Peacock, President, ALMAG Aluminum*

Recognized as one of Canada’s Best Managed Companies, ALMAG understands that true customer satisfaction comes from delivering an exceptional service and a superior product. Our goal is to provide Customers with peace of mind knowing that quality products, short lead times and customer satisfaction is our top priority through all four pillars of service — Design, Extrude, Fabricate and Finish. We believe in building strong relationships around reliability and ownership which go hand-in-hand with our core values; respect and fairness, humility, passion for progress and ownership. Recognizing that people create culture, our core values are fundamental drivers of our workplace environment.

JOB DESCRIPTION

Directly responsible to the Engineering Manager. Provide Engineering, Sales, Manufacturing and Project Management support. This position will require candidate to perform in all aspects of business including design engineering, SolidWorks, Solid Edge ST5 3D modelling, assemblies, drawing creation, tooling quotes and reverse engineering.

Key Responsibilities

- Creation of high quality extrusion die drawings,
- Creation of high quality fabrication drawings,
- Maintenance of drawing specifications and standards,

- Coordinate with and consult other workers to design, lay out, or detail components and systems and to resolve design or other problems
- Review and analyse specifications, sketches, drawings, ideas, and related data to assess factors affecting component designs and the procedures and instructions to be followed.
- Operate DII Ascona scanner applications, (2D optical scanner)
- Comply with all quality related policies, procedures and system requirements

DESIRED SKILLS AND EXPERIENCE

Experience

- Candidates should have 6-12 months experience in a similar role.
- SolidWorks experience an asset. Excellent working knowledge of drafting standards, GD & T, stack-ups, and manufacturing processes a must.
- Machine shop, fabrication house, or extrusion plant experience is desirable.
- Must have a good command of English; both written and oral.

Education

Completion of a one to two year college program in Drafting, and technical training.

Personality Traits

- Should have high energy level, a positive attitude and be able to work without direct supervision and consistently meet deadlines.
- Should be a strong team player and work well with others.
- Good time management and organizational skills are necessary.
- Must be mechanically inclined, able to deal with numbers naturally, and be detailed oriented.
